
Professional Email Setup

Give your business email a professional home.

Why have us do it

- Separate business email from personal messages.
- Use an address linked to your own domain.
- Make forwarding and signatures work properly.
- Know where to find and manage your mail.

How we'll do it

1. We review domain and mailbox options.
2. We configure email on supported devices.
3. We set up forwarding, signatures and filters.
4. We test sending and receiving messages.

What we need from you

- Your business domain or an agreed plan.
- Access to your mailbox provider account.
- The devices requiring email.
- Payment of any third-party subscriptions.

That's it: you tell us what you need, we set it up and check it.
