
Get Your Business Selling Online with a Shopify Shop

We build it, you sell. Your shop, open 24/7, without the tech headaches.

Why have us do it

- You can do it yourself, but your time is better spent on your business
- We get it right first time, so your shop looks professional from day one
- Payments, shipping and design are set up properly, not half-finished
- You get a shop that's ready for orders, not a project to manage

How we'll do it

1. We talk through what you sell and how you want your shop to look
2. We set up your Shopify account and plan
3. We add your products, photos and prices
4. We connect payments and shipping, then check it all before launch

What we need from you

- Your product photos and descriptions
- A payment account to receive your money
- A quick look to approve your shop before it goes live
- Shopify's monthly subscription, paid to Shopify

That's it: you tell us, we build, we check, you sell.
