
Computer Setup & Optimisation

Set up, speed up and get back to everyday work.

Why have us do it

- A computer configured properly saves time and frustration.
- We install essential programs and review useful settings.
- We can check startup apps, storage and common slowdowns.
- You get a practical setup, not a list of technical chores.

How we'll do it

1. We discuss your device and what you need it to do.
2. We review updates, accounts and security settings.
3. We install agreed apps and tidy up basic settings.
4. We test the setup and explain what has changed.

What we need from you

- Your computer and access to its account.
- Details of the software you want to use.
- Any licence keys or paid subscriptions needed.
- Time to review the changes with us.

That's it: you tell us what you need, we set it up and check it.
