Professional Email Setup

Give your business email a professional home.

Why have us do it

- A domain email helps keep work and personal mail separate.
- Proper setup reduces missed messages and confusion.
- Signatures and forwarding make daily work easier.
- We check that sending and receiving work correctly.

How we'll do it

1. We review your domain and email provider options.
2. We configure the mailbox and supported devices.
3. We add signatures, forwarding and basic spam filtering.
4. We test email and show you how to manage it.

What we need from you

- Your domain name or an agreed plan to obtain one.
- Your chosen mail hosting account.
- Access to the devices needing email.
- Payment of domain and mailbox provider fees.

That's it: you tell us what you need, we set it up and check it.
