
Backup & Data Protection

Protect the files and photos you cannot replace.

Why have us do it

- Accidental deletion and device faults can happen to anyone.
- A regular backup makes recovery much more practical.
- We help you choose a setup that suits your devices.
- We show you how to check that your backups work.

How we'll do it

1. We identify important files and where they are saved.
2. We choose suitable drive or cloud backup options.
3. We configure an agreed backup routine.
4. We check a sample restore and explain ongoing checks.

What we need from you

- Access to the devices and files you want protected.
- An external drive or cloud account, if needed.
- Any storage subscription paid to its provider.
- Time to approve the backup plan.

That's it: you tell us what you need, we set it up and check it.
