
VPN & Online Privacy

Browse more privately, with the right settings.

Why have us do it

- A VPN can protect traffic on untrusted networks.
- Browser settings can reduce unwanted tracking.
- Online privacy involves more than one tool.
- We explain realistic limitations and benefits.

How we'll do it

1. We discuss your privacy concerns.
2. We install your chosen VPN where supported.
3. We set up safer browser privacy controls.
4. We test and explain everyday use.

What we need from you

- Your devices and account access.
- A VPN subscription if you choose a paid plan.
- The browsers you normally use.
- Time to learn the important settings.

That's it: you tell us what you need, we set it up and check it.
