
Backup & Data Protection

Protect the files and photos you cannot replace.

Why have us do it

- Device faults and mistakes can happen to anyone.
- Reliable backups reduce the impact of lost files.
- We plan a setup to suit your devices.
- We show you how to check that backups work.

How we'll do it

1. We identify the files you need to protect.
2. We choose suitable drive or cloud storage.
3. We configure an agreed backup routine.
4. We test a sample restore together.

What we need from you

- Your device and important files.
- A drive or cloud account where required.
- Any storage subscriptions paid to the provider.
- Approval of your chosen backup setup.

That's it: you tell us what you need, we set it up and check it.
