
Software Installation & Training

Get useful software working for you.

Why have us do it

- The right software can make everyday tasks simpler.
- Free and open-source tools are often good options.
- Correct installation avoids unnecessary problems.
- A short demonstration helps build confidence.

How we'll do it

1. We discuss the tasks you want to complete.
2. We recommend suitable compatible applications.
3. We install and configure agreed software.
4. We show you the most important everyday functions.

What we need from you

- Your computer and permission to install software.
- A list of tasks or programs you need.
- Any paid licences required by the software.
- Time to practise the steps with us.

That's it: you tell us what you need, we set it up and check it.
